Chestnut Computing Lessons: Canva for Education

Dear Parents and Carers,

This term, we will be beginning our Desktop Publishing unit of work in Computing lessons. During these sessions, the children will be learning how to use Canva to create a magazine front cover. They will then reflect on the positives and negatives of using desktop publishing compared to more traditional methods.

We will be using the 'Canva for Education' area of Canva, which is an online design platform where children can work on their creative projects. The work in this area can only be seen by the class teacher, the child themselves and the other students in the class.

If you are happy for us to create a 'Canva for Education' account for your child, please sign the form below as soon as possible. If permission is not given, your child may be able to join with a partner or they will need to complete their work in their book instead of using the platform.

If you have any questions, please do get in touch.

Best wishes,

Miss Crockett
